

INDIO Claims Management Database and Support Tools installation instructions for downloaded webimage.zip from web-site

After downloading the webimage.zip file to your computer, unzip the file to a temporary directory. You may delete this directory and its contents after completing the installation.

NOTE: Windows NT users MUST have Service Pack 3 or above installed for installation of this product. For this download version of the demo, your system must have MS-Access 2000 installed on the computer prior to installation of the program. If you do not have MS-Access 2000, then request a demo CD that has the MS-Access runtime library on the disk from us by email. The runtime library was not included in the on-line demo because of its large size.

1. Insert Claims Management distribution CD in CD drive.
2. Select Start ->Run on the taskbar.
3. Type D:\Setup.exe where D: is your CD-ROM drive letter.
4. Click the OK button

For Windows 2000/ME/XP goto step 10

5. Windows 98SE/NT will receive a message window stating that Setup cannot continue some files are out of date.
6. Click the OK button.
7. A prompt appears saying to Restart Windows.
8. Click on the Yes button.
9. Windows restarts, log back in and execute steps 2-4 again.
10. INDIO Claims Management Database Installation window appears.
11. Click OK button to install.
12. Select the Program Group or take the default and click Continue button.
13. Setup complete window appears. Click OK button.
14. A note about Acrobat Reader installation will appear in a notepad window.
15. Claims Management Database can now be executed from the Start ->Programs ->Indio Software ->Claims Management menu item.

A desktop icon has been provided named "INDIO.ico" that you can utilize should you choose to create a desktop shortcut. It can be found in the root directory of the distribution CD-ROM for your convenience. Consult your Windows reference manual or HELP for instructions on creating a desktop shortcut.
